FINAL ACTION

Amendment Entry

1. Applicant's response to the Office Action mailed 12/28/09 is acknowledged (Paper filed 6/25/10). In the response filed therein claims 20 and 23 were modified. New claims 24-28 have been added. Claims 1-28 are pending.
2. Claims 1-19 and 22 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim.
3. Currently claims 20, 21, and 23-28 are under consideration.
4. Rejections and/or objections of record not reiterated herein have been withdrawn.

NEW GROUNDS OF REJECTIONS NECESSITAED BY AMENDMENT

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

- I. Claims 25-28 are rejected under 35 U.S.C. 102(b) as being anticipated by Schonbeck et al. (Circulation, 2001, Vol.104, pages 2266-2268).

Schonbeck et al. disclose methods of measuring soluble CD40L in patients with unstable angina. The immune-signaling dyad CD40/CD40L promotes atherogenesis and is elevated with unstable angina.

Art Unit: 1641

sCD40L levels of healthy middle-age women were found to be significantly higher in participants who subsequently developed myocardial infraction, stroke, and cardiovascular death. This trend remained in a 4 year follow-up measurement. See abstract and page 2268.

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

II. Claims 20, 21, 23, and 24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schonbeck et al. (Circulation, 2001, Vol.104, pages 2266-2268) in view of Corsini et al. (Pharmacology & Therapeutics, Vol.84, 1999, pages 413-428).

Please see Schonbeck et al. (Circulation, 2001, Vol.104, pages 2266-2268) as set forth above.

Schonbeck et al. (Circulation, 2001, Vol.104, pages 2266-2268) differ from the instant invention in not specifically teaching the administration of statins as a therapeutic vascular agent to a patient.

Art Unit: 1641

However, Corsini et al. teach procedures for administering statins to inhibit 3-hydroxy-3methyl-glutaryl coenzyme A. See abstract and Table 2. Statins can ameliorate vascular atherosclerosis and reduce cardiovascular-related morbidity and mortality in patients with or without coronary artery disease (CAD) symptoms. See page 414 -1st column, Introduction. It would have been prima facie obvious to one of ordinary skill in the art at the time of applicant's invention to treat the detected vascular patients of Schonbeck et al. (Circulation, 2001, Vol.104, pages 2266-2268) with the statin drugs of Corsini et al. because Corsini et al. taught that Statins can ameliorate vascular atherosclerosis and reduce cardiovascular-related morbidity and mortality in patients with or without coronary artery disease (CAD) symptoms. See page 414 -1st column, Introduction.

Response to Arguments

Applicant's amendment and response have been carefully considered and found persuasive. Accordingly, new grounds of rejections are presented herein.

7. For reasons aforementioned and already of record, no claims are allowed.
8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 1641

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
